To whom it may concern,
I am writing this letter in opposition of the NAB petition 04-160 which is aimed at restricting the broadcast rights of XM Radio. I am a subscriber of XM and when traveling, I rely heavily on XM to bring me the weather and traffic info I want without having to deal with all the annoyances of AM and FM based stations. I do not mind paying the monthly subscription fee because the quality, hassel-free and commerical-free aspects of XM make it very worth while. The fact that the NAB is trying to restrict my right to recieve the services that I pay for is maddening and unjustifiable. I believe that America is a place where the quality of a product is what determines if it will be successful or not, and if the NAB is concerned that XM is providing a better service than they are I feel it is disgusting that they are trying to downplay XM in order to promote the less desirable product which they represent. Please do not allow this group to take away a serice that thousands of us rely on, only because they feel threatened and refuse to bring their product up to the high standards the XM meets every day. Thank you for your time.
